Med Aduh

Davao City, Philippines • im.ramidem@gmail.com | github.com/ramidem | linkedin.com/in/med-aduh

Work History

Symph

Remote

Fullstack Software Engineer

Nov 2020 - Present

Built and maintained client web products across finance, retail, HR and healthcare, so teams and customers could get their daily work done in one place.

Financial Services Platform

Jan 2021 - Nov 2025

- Maintained a financial services platform for nearly five years (React, TypeScript, JavaScript, HTML, CSS, Node.js, SQL, Google Cloud), so branch staff could verify customers, transfer money and run reports smoothly.
- Built microservices with RESTful APIs for transactions, customer checks and PDF/CSV reports, so staff could review balances and fund transfers.
- Built the online shop checkout with MCash and PayMongo payments, so customers could pay and pick up orders.
- Maintained the database logic behind transfers and reports (stored procedures, SQL) while mentoring teammates, reviewing code in Git and acting on feedback, so reports rolled up by branch and region.

Content Management Platform

Jan 2025 - May 2025

- Led a content platform from scratch (React), collaborating with the client's team and guiding developers, so staff could manage marketplace content from one screen.
- Set up the Google Cloud DevOps pipeline (Docker, CI/CD), so every change was checked before going live.

HR and Payroll Platform

Feb 2026 - Jun 2026

- Led a full-stack HR and payroll system from scratch (TypeScript) using AI coding tools, with daily Agile standups, so companies could manage staff, leave and payroll in one place, with each person seeing only what they need.

Distributor Operations Platform

May 2026 - Jun 2026

- Led a full-stack operations tool from scratch, setting priorities with the team and explaining choices to non-technical staff, so sales teams could track accounts, visits and reports in one place and export them when needed.

Education

Western Mindanao State University

BS, Mass Communication/Media Studies

Graduated
